

Services Officer

28 February 1949

Chief, FBIB

Construction of Fence at Engineer's Residence, West Coast  
Bureau, FBIB

Ref. : Teletype Message No. R231451 to Chief, FBIB from Chief, West  
Coast Bureau. (Copy attached)

1. It is requested that:

a. FBIB be granted authorization for construction of a  
wood fence to surround the Engineer's residence now under  
construction at the West Coast Bureau, FBIB, Reseda, California.

b. Proper action be initiated through the Office of the  
Chief of Engineers to request implementation of the project  
by the Los Angeles Area District Engineer.

2. The Engineer's residence will be Government quarters  
occupied on a reimbursable basis by the Chief Engineer of the  
station. Inasmuch as the residence is near a public roadway and  
is at present unprotected by fences, hedges, or other means, the  
fence requested in 1 a above is necessary for protection of Govern-  
ment property.

3. Authority for this work should be granted at the earliest  
practicable date because of the fact that the residence is due to  
be completed on or about 4 March 1949. The estimated cost is  
approximately \$270. This office has been advised that the local  
Engineers have in this project sufficient contingency funds for  
construction of the fence.
